CONSTRUCTION TRAINING
BUILT AROUND YOUR CAREER

Practical training. Professional results.

NVQs | EUSR | Plant Training | Confined Spaces | Streetworks | Health & Safety | SSSTS | SMSTS

McGovern ASSESSMENTS

WE HAVE A GENUINE DESIRE TO HELP ALL DELEGATES REACH POSITIVE OUTCOMES.

Whether you need an SSSTS ticket, an NVQ qualification, or NPORS plant training, we're here to help.

We know construction training isn't just a box to tick. It's the difference between a contractor walking onto site confident and compliant, or being turned away at the gate. That's why every course we deliver is built around one goal: getting you where you need to be, in a way that works for you.

Training that fits around working lives

Construction doesn't stop for training, so neither do we. Our courses run 7 days a week, delivered either at your premises or at ours, whichever suits your team, and project timelines. No lost days on site, no unnecessary travel. Just training that slots into your schedule, not the other way around.

Every pathway, one provider

From short statutory courses like SSSTS and SMSTS, to full NVQ qualifications that recognise real on-site competence, through to NPORS plant and machinery training, we cover the full range of routes into and through the industry. Whatever stage a delegate is at, we have a course that moves them forward.

People, not just paperwork

Behind every ticket and certificate is a person trying to build a career, keep a team compliant, or move a project forward. Our instructors bring industry experience, and our team genuinely cares whether delegates pass, understand, and apply what they've learned, not just whether they sat in the room.

Why it matters

- Flexible delivery: your site or ours, 7 days a week
- Full qualification pathway: from entry-level tickets to NVQs and plant competence
- Experienced, industry-qualified trainers focused on outcomes, not just attendance
- Minimal disruption to your projects and your people
- A partner, not just a provider, invested in getting your team competent, compliant, and confident

Whatever the qualification, whatever the timescale, we're here to help you get there.

Courses include:

NVQ Level 2 Trade
General Construction (Groundworks)
Trowel (Bricklaying)
Formwork (Joinery)
Steel Fixing
Cladding
Dry Lining / Plastering
Painting & Decorating
Passive Fire Protection
